

Three-buckle children's climbing harness for small rock stars. With this harness, they'll be safe and comfortable at heights.

## DESCRIPTION

Well thought-out design of the waist belt and leg loops, which uses 2 webbings running along the sides of the padding, distributes the load efficiently and ensures greater comfort when sitting or hanging in the harness.

Durable belay loop has a width of 12 mm and a strength of 15 kN.

Reinforced tie-in points are a matter of course.

EVA foam padding is covered on the inner side with a porous 3D fabric and on the upper side with a breathable fabric with high abrasion resistance.

Rock&Lock buckles on the leg loops also allow the harness to be easily put on even with skis or crampons on the legs.

In the back there is a haul loop with a load capacity of 10 kg.

ARA is for children who already have sufficiently developed hips for proper positioning and adjustment of the harness.

2 shaped gear loops with textile braid and 5 kg load capacity are ready to carry quickdraws and other equipment.

You can easily adjust the waist and leg loops with 3 patented stainless steel Rock&Lock buckles.

## KEY FEATURES

- this harness is tailored to children's shapes – it has the specially shaped waist belt and adjusted waist belt to leg loops size ratio
- you can choose from two sizes

## STANDARDS

CE 1019  
EN 12277, type C

## FEATURES

UIAA

size K2  
283 g / 10 oz

3  
YEARS  
guarantee

## MATERIALS

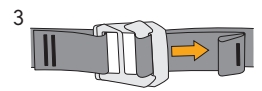

- 43 % PES
- 22 % PAD
- 21 % steel
- 8 % EVA foam
- 6 % PP

## TECHNICAL DATA

SIZE	K1	K2
A [cm]	55–65	60–70
A [in]	21.5–25.5	23.5–27.5
B [cm]	35–40	40–45
B [in]	14–16	16–17.5

## TECHNICAL DATA

Power distribution at the waist belt and leg loops:

## COMPARISON

### ARA C5086 vs. ARA C5070

- Different construction - 2 equally wide webbings running along the edges of the padding distribute force more efficiently. Especially on the leg loops, where originally there was one wider strap in the middle, the current design is more comfortable.
- Lower weight, while increased seating comfort and more durable fabric.
- The new generation does not have the BMI adjustment system on the waist belt.
- 2 elastic bands on the waist belt allow a better attachment of the free end of the tightening strap.

ARA C5070

## OTHER VIEWS

## MAINTENANCE

Lifetime of this product depends on the frequency and the environment (salt, sand, moisture, chemicals, etc.) in which is used. Without taking wear or mechanical damage into account and in compliance with the conditions specified in the instructions for use this product may be used 15 years from the date of production and 10 years from the date of the first use.

However mechanical damage can occur during the first use, which can limit the lifetime of this products only to its first use.

beware of salt

beware of UV

beware of chemicals
