

↑ WIZARD

Light ice axe designed for traditional alpine mountaineering.

DESCRIPTION

Ice axe head is ergonomically shaped and makes self-arrest manoeuvre easier. Holes in the head are big enough for attaching a carabiner.

Pick is made of durable chromoly steel and it easily penetrates even hard snow or alpine ice.

Three different lengths.

Shaft is made of high-quality 7075-class aluminium alloy, the bottom part includes an anti-slip grip.

Hole in the spike is big enough for attaching a carabiner.

Adze is designed for easy cutting of steps or snow platforms.

Curved shaft under the head makes climbing in icy or mixed terrain easier while the bottom straight part easily penetrates snow.

Leash FIX included.
