

↑ POLE

Belt for work positioning and prevention against the falls from a height.

DESCRIPTION

Anatomic padded waist belt ensures minimal bruising and enough comfort in the waist area.

Two side D-rings for work positioning according to EN 358, tested for 15 kN.

Two braided gear loops with a bearing capacity of 15 kg.

SPEED buckle allows easy manipulation when dressing up and undressing.

Slots designed for a secure hanging of expensive equipment (such as power saw, drilling machine) with a strength of 35kg.
