

SEAMASTER 3D

stainless steel

Fully adjustable harness for rope access with a padded wide waist belt, leg loops and shoulder straps. Suitable for work positioning, fall arrest and work restraint situations. This harness is specially intended for workers at offshore oil platforms.

DESCRIPTION

Webbings stitched in the easy-lock buckles on the shoulder straps simplify handling. A different strap color is used for different harness sizes.

Front attachment point marked with the letter A, stainless „D” point with a load capacity of 15 kN.

3 braided gear loops with a bearing capacity of 5 kg.

Combination of standard and COBRA speed buckles enable fluent and fast adjustment to fit the users body.

Stainless steel buckles.

Easy fixing of CAM CLEAN ascender in vertical position is provided by stitched strap.

Wide waist belt provides maximum comfort when working at height.

Side attachment points for work positioning according to EN 358 using connectors EN 362.

KEY FEATURES

- stainless steel components makes the harness ultimate choice for offshore operations
